Mineral Industries Experiment Station Circular No. 46

RESEARCH: A FUNCTION OF THE UNIVERSITY

The findings described in this bulletin are part of a large research program carried on in many fields as one of the primary functions of The Pennsylvania State University.

The foundations of the University are the Morrill Land-Grant Act of Congress signed by President Lincoln in 1862 and the 1863 act of the Pennsylvania Legislature naming this institution as the one to carry out the terms of the federal act.

The University's research program brings the methods and procedures of modern science to the attention of the agricultural and industrial interests of the State and the Nation. Active projects are being carried on in all the Colleges and nearly all departments of the institution.

Results of this research are reported in numerous contributions to scientific and professional journals and in bulletins published by the Agricultural Experiment Station, the Department of Engineering Research, and the Mineral Industries Experiment Station.

Fundamentals of Ferrous Process Metallurgy, 4th ed. A revision and change in title of *Ferrous Metallurgy, Volume I* by E. J. Teichert. Gray Printing Company, Falls Creek, Pa. 483 pp. August 1954.

R. B. HEWES

Should Industry Train Its Supervisors? *Ceramic Age* 64(4):11-14. October 1954.

What Are Successful Human Relations? *Mechanization* 18(11):75-78. November 1954.

D. C. JONES

The Modernization of No. 9 Mine—A Modern Mine. *Mechanization* 18(7):59-61. July 1954.

Planning Plus Equipment Equals Tonnage. *Mechanization* 18(7):62-64. July 1954.

Either Coke or Steam. *Mechanization* 18(9):87-92. September 1954.

New Machine Drives Cloverleaf Slope. *Mechanization* 18(11):87-90. November 1954.

Protection-Plus Incorporated in Ventilation Plan. *Mechanization* 18(11):99-100. November 1954.

Report of Vocational Training Committee. *Proceedings of the Coal Mining Institute of America*. pp. 18-19. 1954.

Deeper Stripping Problem Solved with Dragline. *Mechanization* 19(2):75-77. February 1955.

New Portal Designed for Short Life. *Mechanization* 19(2):81-83. February 1955.

Rear-Dump Overburden Carriers Permit Economical Thin-Seam Stripping. *Mechanization* 19(3):61-63. March 1955.

Pioneered Production Methods. *Mechanization* 19(5):45-46. May 1955.

Continuous Mining Approaches Reality. *Mechanization* 19(5):47-49. May 1955.

Long Rooms for High Productivity. *Mechanization* 19(5):50-52. May 1955.

To Meet Customer's Demand. *Mechanization* 19(5):53-55. May 1955.

O. F. SPENCER

Natural Gas Engineering, 3rd ed. A revision and change in title of *Natural Gas Engineering, Volume III*, by M. M. Stephens and O. F. Spencer. Gray Printing Company, Falls Creek, Pa. 578 pp. September 1954.

PENNSYLVANIA'S COLLEGE OF MINERAL INDUSTRIES AND EXPERIMENT STATION

Dedicated to education in mineral conservation and research by which the means may be found to make conservation effective. This includes diligent search for mineral truths and the energetic discovery, complete recovery, and maximum utilization of irreplaceable mineral resources.

§

FIELDS OF WORK

EARTH SCIENCES: Geology, Mineralogy, Geophysics, Geochemistry, Meteorology, and Geography.

MINERAL ENGINEERING: Mineral Economics, Mining Engineering, Mineral Preparation Engineering, and Petroleum and Natural Gas Engineering.

MINERAL TECHNOLOGY: Fuel Technology, Metallurgy, and Ceramic Technology.

§

DIVISIONS OF SERVICE

RESIDENT INSTRUCTION, EXTENSION INSTRUCTION, CORRESPONDENCE INSTRUCTION, MINERAL INDUSTRIES RESEARCH
